City of Loris reserves the right to reject any and all submissions or any parts thereof and to waive any irregularities or minor informalities in any submission or in the procurement process and to make a contract award in the best interest of the City of Loris.

This project is being funded in whole or in part by the South Carolina Infrastructure Investment Program (SCIIP), which is administered by the South Carolina Rural Infrastructure Authority (RIA) and funded by federal State and Local Fiscal Recovery Funds (SLFRF) through the American Rescue Plan Act (ARPA). All federal SLFRF requirements and SCIIP requirements will apply to the contract. All contractors and subcontractors are required to be registered in the federal System for Award Management (SAM) and may not be debarred from doing business with the federal government. Respondents on this work will be required to comply with all applicable federal regulations, including those listed in Exhibit A.
1. INTRODUCTION

City of Loris is issuing this Request for Qualifications (RFQ) to identify a qualified civil engineer to provide a full range of engineering services to support the implementation of the Sewer System Upgrade. These services will be provided under contract with the City of Loris, with funding provided by the South Carolina Rural Infrastructure Authority (RIA) through the South Carolina Infrastructure Investment Program (SCIIP) under SCIIP Grant #A-23-C123 and RIA State Grant #R-23-C123

1.1. Method of Procurement

This is a qualifications-based selection. Award will be given to the most responsible, responsive and most highly-qualified engineering firm based on the factors outlined in Section 5, SELECTION CRITERIA. Cost is NOT a factor in the ranking of firms to provide services herein. DO NOT include any reference to consultant costs in the RFQ response. Any RFQ response with any discussion of cost will be disqualified. Contract fees will be negotiated after selection based on the project scope. A general scope of work is outlined below.

Firms are advised that this evaluation and selection process is a competition and not simply a prequalification. It is the intent of the City of Loris to award the contract to a single Firm.

1.2. Project Description

The SCIIP funding will be used to upgrade gravity sewer line by means of pipe bursting, reconnecting sewer services, upgrading the interior of existing manholes, adding new manholes as needed to meet DHEC spacing requirements, bypass pumping, traffic control, and all restoration required to complete the work. This project will consist of three main parts:

A. **Pipe Bursting** - This project will use pipe bursting technology to upgrade the existing 8", 10" & 12" clay sewer mains with new 8", 10" & 12" HDPE sewer mains.

B. **Reconnection of Existing Services** - All homes and businesses will be reconnected to the new HDPE sewer main. Each customer will receive new service piping up to the public right of way line along with a new cleanout. The cleanout will allow access to the service piping so that it can be properly maintained in the future.

C. **Rehabilitation of Existing Manholes** - The interior of the existing manholes will be upgraded by applying a modern coating system capable of withstanding the sewer gases that the manhole will be exposed to in the years to come. A new manhole frame and cover will also be installed as needed.

The application for SCIIP funding, which includes a detailed project description as well as preliminary engineering information, can be found here. [https://www.cityoflorissc.com/bids-for-purchases-or-contracts](https://www.cityoflorissc.com/bids-for-purchases-or-contracts)

Any contracts awarded as a result of this procurement process will be between the respondent and the City of Loris.

Per RIA SCIIP guidelines, any contract negotiated because of this procurement process will require approval from RIA prior to award/execution.
